# DROP CURTAINS

**Canvas Concepts were one of the first companies to introduce roller-style drop down curtains to the New Zealand market.**

Drop curtains can be hung from virtually any overhanging structure to provide protection from light/medium wind and rain. Suitable for business or home use, these drop curtains come with a wide range of sizes and colours to suit your preferences. The drop curtains are made using a high frequency welding process, with flame retardant PVC and there is also a 5 year warranty on materials and workmanship.

- Options available, motorized, gearbox, manual hand roll systems, and channelled systems.
- Channelled systems are guided by a vertical track to keep the curtain in place and controlled.
- They come with a motor drive option or a manual wind option.
- Our drop curtains are produced using the very highest grade of materials ideally suited to the New Zealand weather conditions.
- Our clear drop screens are all custom manufactured to your needs.
- Increase your privacy without blocking your view while also providing a stylish and modern look to your property.
- Allows you climatic control 365 days of the year.
- These drop curtains make it possible to expand your living areas by moving your indoors outdoors while providing weather protection.
- With drop curtains you have 3 options namely, full PVC, mesh or clear glass PVC in the middle with a coloured border.
- The hardware of our drop curtains can be powder coated to match any fabric or paint colour.
- Eyeletted options also available.
- Drop curtains are not suitable for high wind situations.
- Our drop curtains also come with an included valance on the bottom and can include signage to increase your profile.
- They are incredibly simple and easy to operate, while requiring very low maintenance-warm soapy water will do the trick!
- They are great for use in residential, school and commercial areas.
- Custom built to fit your deck size and fitted to a powder coated overhead roller system the units are easy to operate, trouble free and tidy when rolled up or hand rolled.
- Warranty Covering faulty material and workmanship.

## HAND ROLLED CURTAINS

Hand rolled drop curtains are attached at the top by a rope in an aluminum rope track.

They have a fabric pocket at the bottom, with a galvanized steel or aluminum tube, to allow easy rolling of the curtain up to the Velcro ties and to keep the fabric flat.

Stainless steel saddles with are riveted to this bar, which attach to the ground fittings.

## GEARBOX CURTAINS

Gearbox drop curtains have a 63mm/80mm roller tube, with aluminum wall brackets and a crank handle.

They have a fabric pocket at the bottom, with a galvanized steel or aluminum tube, to keep the fabric flat. Stainless steel saddles with boat snaps are riveted to this bar, which attach to the ground fittings.

## ZIPPED CURTAINS

Zippered drop curtains are attached on three sides by rope in an aluminium rope track.

They have zips up both sides of the curtain with a galvanized steel or aluminium tube in a small pocket at the bottom, to allow easy rolling of the curtain up to the Velcro ties and to keep the fabric flat.

## ZIPTRAK CURTAINS

Ziptrak drop curtains are spring loaded curtains which have a rope on each side which runs down an aluminium channel they have a fabric pocket at the bottom, with an aluminium bar to keep the fabric flat, which locks into the "storm lock" at the bottom of the side channels.

No ground fixings are required.

## CHANNELLED CURTAINS

The channel system consists of a gearbox rolled drop curtain with an aluminium channel on each side down which the fabric travels.

The curtain is attached to a roller tube with cast aluminium wall brackets and a gearbox and crank handle.

They have a fabric pocket at the bottom, with an aluminium bar, to keep the fabric flat, which can be locked in place at various points down the channel. No ground fixings are required. The channels are able to be powdercoated to match your house or any other structure you desire.
